Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

QA Automation Engineer and SDET with 4+ years of experience in test automation and manual testing across tax compliance and ACA software domains. Proficient in Python, Selenium WebDriver, Playwright, Robot Framework, and PyTest. Expertise in Behavior-Driven Development, Page Object Model, CI/CD pipelines, and REST API testing using Postman. Achieved a 75% defect detection rate and reduced bug detection time by 80%. Skilled in Agile, Scrum, SDLC, and STLC methodologies.

WORK EXPERIENCE

QA Engineer

Aug 2025 – Present

Span Technology Services Private Limited

Coimbatore, India

- Engineering automation for 1,200+ regression and functional test suites using Python and Selenium WebDriver, maintaining a 75% defect detection rate and improving release quality across cycles.
- Optimizing project workflows using SDLC, STLC, and Agile practices, enhancing testing efficiency, sprint velocity, and delivery timelines.
- Building manual and automated quality assurance strategies using Python and Robot Framework, expanding test coverage and reducing bug detection time by 80% across critical modules.
- Designing a Behavior-Driven Development framework using PyTest, aligning test scripts with business requirements and reducing cross-functional misunderstandings.
- Managing source versioning with GitHub and integrating Jenkins for CI/CD pipelines, reducing deployment times by 100% with real-time communication via Slack and Teams.

QA Engineer

Dec 2021 – Jul 2025

Assent Global Business Services

Coimbatore, India

- Conducted smoke and regression testing per release cycle using Selenium WebDriver and Python, validating system stability and minimizing post-release production issues by 35%.
- Documented and tracked defects in Jira, resolving issues efficiently and reducing defect turnaround time by 25% throughout the testing lifecycle.
- Automated regression, retest, smoke, sanity, integration, and functional test cases using Selenium WebDriver and Python, maintaining a 92% successful execution rate.
- Worked on ACA compliance platform (Acawise 1095C/1095B) and automated employee data processing using Python, increasing filing efficiency by 35%.
- Developed dedicated workflows for IRS error cases and rejections using Robot Framework, accelerating correction processes by 30% and ensuring ACA regulatory compliance.

PROJECTS

Tax Bandits 1099/W2

Aug 2025 – Present

- Developed 50+ scripted test cases using Robot Framework and Python, improving form submission and recipient feature coverage by 40%.
- Performed cross-browser testing across 10+ devices and browsers, verifying 100% usability, consistency, and accuracy across user environments.

Tax Bandits Public API

Aug 2025 – Present

- Created 50+ REST API test cases for Tax Bandits API endpoints using Postman, validating form creation, submission, and retrieval workflows with 98% functional accuracy.
- Validated Tax Bandits API integration with 5 external systems, ensuring seamless data flow and maintaining a 99% data transmission success rate post-deployment.

Acawise 1095C/B

Dec 2021 – Feb 2024

- Automated ACA form processing (1095C/1095B) workflows for Acawise platform and employee data entry workflows, improving filing efficiency by 35% and ensuring error-free compliance reporting.
- Created structured workflows for IRS error handling and rejection scenarios, accelerating correction processes by 30% and strengthening ACA regulatory compliance.

TECHNICAL SKILLS

Languages and Databases: Python, SQL, MongoDB

Automation Frameworks: Selenium WebDriver, Playwright, Robot Framework, PyTest

Testing Types: Functional, Regression, Smoke, Sanity, Integration, Mobile, Database Testing, Cross-Browser Testing

API and Tools: Postman, REST API Testing, Jenkins, GitHub, Jira, Redmine, Zephyr

Methodologies: Agile, Scrum, Kanban, Behavior-Driven Development, Page Object Model, CI/CD, SDLC, STLC

EDUCATION

Sri Shakthi Institute of Engineering and Technology

Bachelor of Engineering

Aug 2017 – May 2021

Coimbatore, India

CERTIFICATIONS

Automation Testing, Python, and SQL Query – Udemy

Develop Slack Bot in Python and Mobile Automation using Appium – Udemy

Robot Framework Test Automation and GitHub Version Control System – Udemy

ACHIEVEMENTS

Appreciated by Project Manager for initiating knowledge sharing among 50 team members

Sep 2024

Received Spot Award for developing and implementing a mobile automation framework

Mar 2024

Earned Spot Award for automating Insurance Plan reports, reducing processing time by 20%

Jun 2023

Won Top Innovator Award for unique and efficient automation coding innovation

Jun 2023
